Profile

Creative and entrepreneurial web and game developer with a passion for bringing the commercial gaming experience to the web. Co-Founder of Ecxo Games, a digital game development studio focused on building interactive, games and softwares. Skilled in full-stack development, user interface design, and creative content production. I love learning new stuff and creating new projects.

Started first job at age 14. Gained early experience in customer service, sales, and inventory. Worked at Metro Grocery (2020-2022), Staples (2022-2023), Variety 343, Skechers, Nike (2023-2024), Elections Substitute (2025)

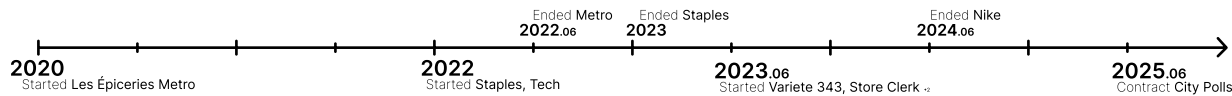

Assignations

- Founder / Lead Developer, ECXO Games - Montreal, QC (2022 - Present)
- Launched ECXO Games to develop and publish web-first video game experiences.

Built and maintained platforms including:

- labs.ecxogames.ca - a public playground for game experiments and concepts
- shawny.app - a productivity & creator utility platform (not available anymore)
- ghostedgames.com - commercial web-based game experiences (merged with shawny.app's features)

Timeline

Timestamps (Timeline)

Stapes, Sales Associate - Tech. Departement (2022-2023)

This job gave me my passion for tech. The first day I arrived, the boss took me and showed me how to work with computers, repair them, and etc... since then, I would not see myself in any other field.

Metro Grocery (2020-2022)

Being my first job as a 14 years old teenager, it I really learned a lot from this job. Doing what I'm being told was hard at first, but I became good at doing tasks efficently.

Variété 343 & Skechers (Summer 2023)

These two jobs really got on my nerves. At first I was so annoyed by the chain of command system, and did everything to complain. But at a certain point, I got to understand the importance of a good management, and it really got me to learn the importance of giving good customer service.

Nike (Summer 2023-2024)

This job was one of my favorite, I met so much good people there, I had a lot of fun. It really was a great ambience, and I learned a lot of clothing manipulation techniques, selling techniques, and more.

City Polls (Contract - 2025)

This gig was very interesting, having to learn how the elections are done and the amount of organization behind was really interesting to all see in action. I was assigned with the role of substitute so I didn't really get to be in the action but the training was very interesting and I learned a lot from it.

Education

- Diploma of College Studies (DEC) - Computer Sciences, CEGEP - Montreal, QC (In Progress)
- High School Diploma (DES - Quebec Ministry of Education) (Completed)
